

Which forms of temporary infrastructure have you used?

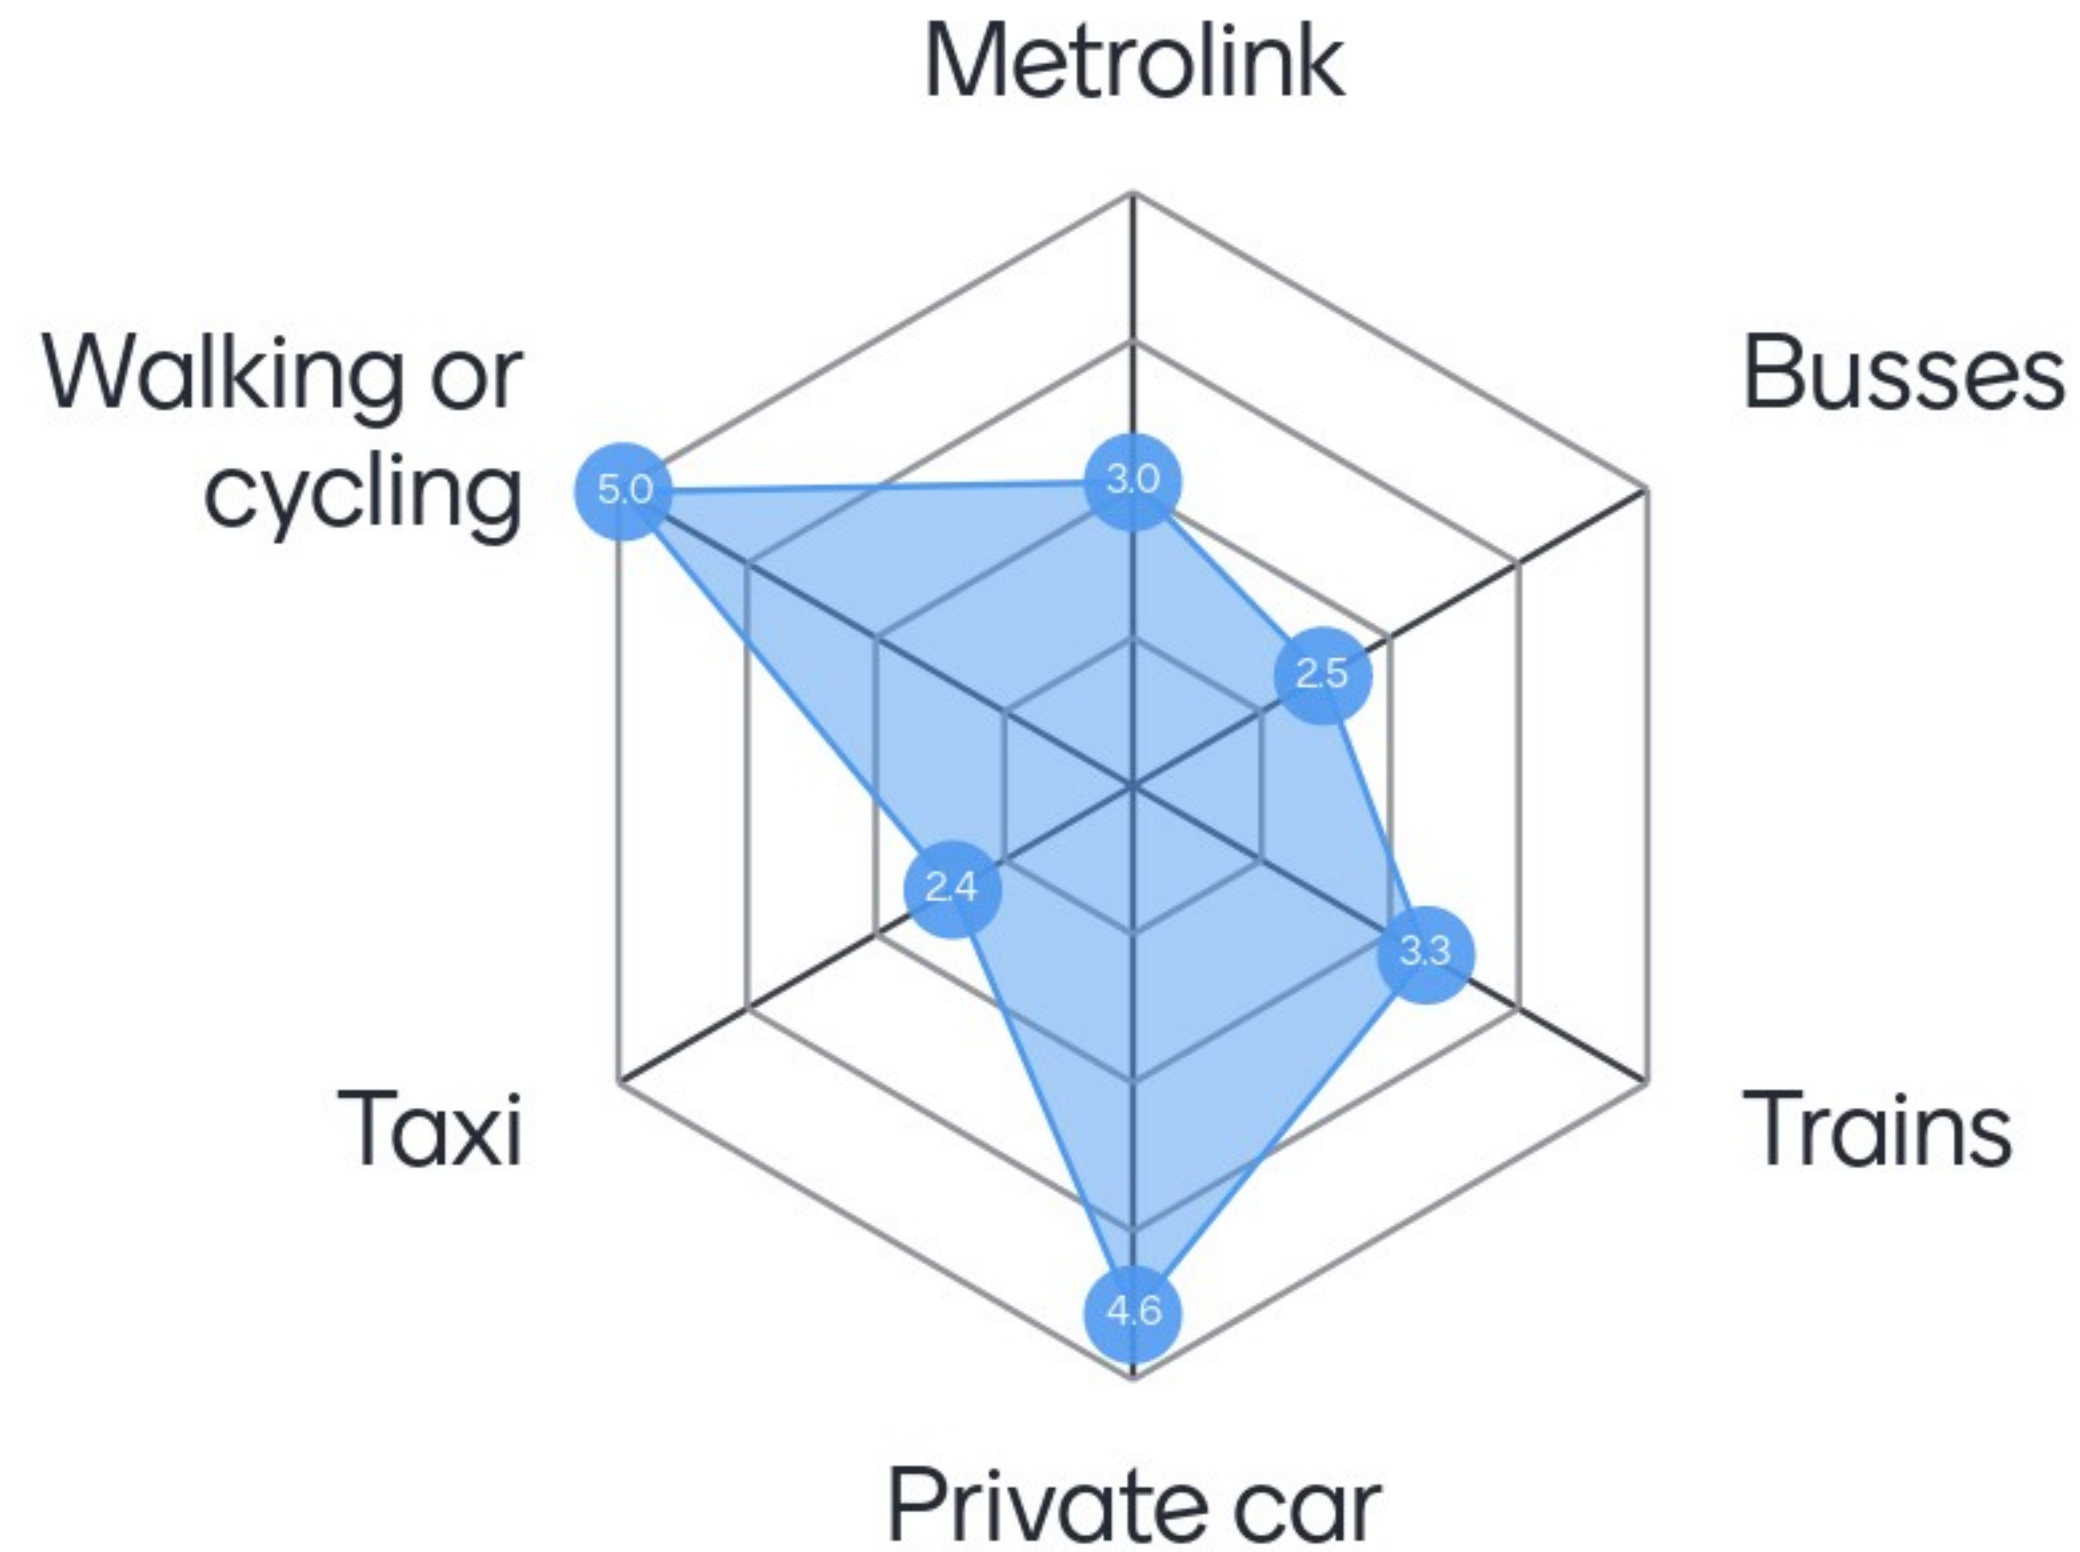

When you have used temporary infrastructure, how did it make you feel?

Thinking about the future...

How covid safe do you think public transport is?

What could be done to improve the (covid) safety of public transport?

enforce mask wearing

greater capacity

More frequent services to provide more space on services

enforcement of mask wearing!

Better ventilation

Is safety improvement needed, or improvement in perception of safety?

More space , better ventilation. Mask wearing, cleaning

not sure

Fact posters on the risks

What could be done to improve the (covid) safety of public transport?

Checking trip purpose

Free first trip back to build confidence

Ban passengers :)

Less Covid!

Clearer messaging, Obvious cleaning, Mask enforcing

masks enforced more encouragement of walking cycling

make sure that no mask/ no clean hands no use. Greater capacity, ventilation, have separate conductors from drivers

Space out seating; spread demand; compulsory mask wearing; hand sanitiser; Mandatory ventilation

Enforced mask wearing

What could be done to improve the (covid) safety of public transport?

Frequent Sanitisation of the handles, seats and air, between journeys depending on the occupancy levels or the busiest routes

combat perceptions of danger in terms of actual risk of infection on PT
